**PRODUCT CATALOGUE**

BUBBLEBUSTER® SPIKED ROLLERS

Our **BUBBLEBUSTER®** Spiked Roller has become the brand that most contractors prefer for spiking coatings. Our rollers with 12mm spike are for all types of high build and self-leveling floor coatings. Our 12mm Super Sharp rollers are for fast setting coatings.

**BUBBLEBUSTER®** spiked rollers with 31 mm spikes are for spiking floor overlays in excess of 4mm thick. They are available in a multitude of widths and are sold as complete assemblies with frames in standard form. Replacement roller refills are available in all widths.

INZENGA SPIKED ROLLERS

Our **INZENGA** spiked roller with 16mm long spikes is a revolution in the design of loose type spiked roller discs. The sideways ‘flop’ inherent in rollers with individual loose roller discs is relatively zero on the **INZENGA** thereby giving the tool stability and limiting disc drag.

CODE	DETAILS
IZ80100	Spike Roller assembly 100mm

SPIKED SHOES

Our **SPIKED SHOES** with 25mm or 31mm long steel spikes are used to gain safe access onto new flooring overlay systems. They should be worn whilst working on fresh coatings and whilst deaerating the fresh surface when using our **BUBBLEBUSTER®** Spiked Roller. One size fits under most size user’s site shoes or boots, use the straps to secure the **SPIKED SHOES** securely.

BT40108	400mm x 8mm
BT40110	400mm x 10mm

LARGE SPATULAS

Our **LARGE SPATULAS** are available in two sizes. The thin flexible spring steel blade allows the tool to be used for effectively smoothing surfaces while providing troweling qualities. It may also be used as a regular squeegee to apply thin film materials.

CODE	DETAILS
SP30135	300mm long x 100mm
SP60110	600mm long x 100mm

TRIGLIDE SPREADER

A foolproof, simple to use leveller for spreading semi-flowable materials at precise thicknesses with fast application! The **TRIGLIDE** has a stainless steel levelling scraper plate and pre-set replaceable trigliders at each end with three contact points. When one contact point is worn, the wing nuts can be loosened and rotated to the new setting, then securely fastened into place.

TG61010	Replaceable 600mm x 10mm set of 2
TG61012	Replaceable 600mm x 12mm set of 2
TG61014	Replaceable 600mm x 14mm set of 2

BROOM HANDLES

High-quality and durable broom handles for use with our flooring tools. Made from aluminium, they are available as both a fixed 25mm and telescopic version.

CODE	DETAILS
HA1500	25mm x 1.5m Aluminium
HM1400	25mm x 1.4m to 2.5m Telescomic

DOUBLE EDGED STEEL GAUGING RAKES

Our Double Edged Steel **GAUGING RAKES** are for spreading new floor coatings to a desired thickness. A general rule is that the teeth of rakes will spread material to 40% of the tooth depth based on the material used. (i.e. 5mm tooth achieves 2mm).

450MM DOUBLE EDGED

FLOOR SPREADER

Our **KAM FLOOR SPREADER** is an adjustable heavy-duty leveller for the application of flowable overlay materials applied in excess of 4mm thick. The long stainless steel levelling blade features hard-wearing adjustable steel skis at each end that provide fine adjustments from as little as 0mm to as much as 50mm thick.

CODE	DETAILS
FS60080	600mm Wide Floor Spreader 0-30mm
FS80080	800mm Wide Floor Spreader 0-30mm
FS80081	Replaceable Skis for Floor Spreaders

ROUND PINNED LEVELLER

Our adjustable **ROUND PIN LEVELLERS** spread flooring overlay compounds in one easy application. The tools are ideal for application of floor coatings which have good flow characteristics. The levellers are available in widths of both 450mm & 600mm, and are simple to adjust. Our **ROUND PIN LEVELLER** is made from 1.6mm Stainless Steel with an aluminium pin plate holder incorporating five steel pins. It is easily adjusted from 0mm to 12mm for speedy set up.

CODE	DETAILS
PLR31450	450mm Pin Leveller – adjustable 0 – 10mm
PLR31600	600mm Pin Leveller – adjustable 0 – 10mm
PLR31450R	Replacement Round Pin Plate 450mm
PLR31600R	Replacement Round Pin Plate 600mm

ADJUSTABLE SKEG LEVELLERS

Our **SKEG LEVELLER** flooring tool is the perfect choice for applying self-smoothing materials to achieve a uniform thickness. It has four pre-set skag sizes that determines the final depth of overlay. The skegs glide over the substrate with minimum tool chatter, and are available as ‘tap-out tap-in’ replacements in sets of four.

450MM LEVELLERS

CODE	DETAILS
SL33452	450mm x 2mm Skag Leveller
SL33453	450mm x 3mm Skag Leveller
SL33454	450mm x 4mm Skag Leveller
SL33455	450mm x 5mm Skag Leveller
SL33456	450mm x 6mm Skag Leveller
SL33458	450mm x 8mm Skag Leveller
SL334510	450mm x 10mm Skag Leveller

600MM LEVELLERS

CODE	DETAILS
SL33602	600mm x 2mm Skag Leveller
SL33603	600mm x 3mm Skag Leveller

SQUEEGEES

CODE	DETAILS
SQ81450	450mm with Soft Black Rubber
SQ81600	600mm with Soft Black Rubber
SQ91450	450mm with Stiff White Rubber
SQ91600	600mm with Stiff White Rubber
SQ81450R	450mm Black Blades – 10/pack
SQ81600R	600mm Black Blades – 10/pack
SQ91450R	450mm White Blades – 10/pack
SQ91600R	600mm White Blades – 10/pack

Our **SQUEEGEES** come in two sizes and materials. 450mm, & 600mm wide for efficient spreading of primers & thin coatings, which are made of either white or black non-marking rubber.

SCREED BOX

There is no need for screeding bars or time consuming labour intensive set-up. Floor screeding for cement bound or resin-based mortars is simplified by using our stainless steel **SCREED BOX**. Just set the height, weight the ballast cavity, load with material, and pull! After adjusting the front screeding plate to the required height, the surfacing material is applied in a uniformly finished thickness. The use of the **KAM SCREED BOX** will speed up application for a high quality and consistently level flooring finish. Any abutting runs may be filled and smoothed by hand using a trowel.

CODE	DETAILS
