## KD69

115/125mm ANGLE GRINDER

800W \ 11000RPM  
CODE: POG115K001

- Ergonomically designed, making the KD69 easy to grip and comfortable to use.
- Side switch for easy operation.
- 360 degree cooling system; effectively controls the grinder's temperature during use.
- The motor has been manufactured using patented coating technology to extend its life.
- Bevel gears, for reduced operating noise and a longer life span.

## KD69-VS

125mm VARIABLE SPEED GRINDER

800W \ 0-11000RPM  
CODE: POG125K001

- Ergonomically designed, making the KD69-VS easy to grip and comfortable to use.
- Variable speed, with an easily accessible analogue selector at the back of the grinder.
- Side switch for easy operation.
- 360 degree cooling system; effectively controls the grinder's temperature during use.
- The motor has been manufactured using patented coating technology to extend its life.
- Bevel gears, for reduced operating noise and a longer life span.

## KD71-DG

180mm DUSTLESS CONCRETE GRINDER

2600W \ 6600RPM  
CODE: POG180K001

- Integrated dust shroud, for dust free working with all types of grinding and levelling.
- 360 degree cooling system; effectively controls the grinder's temperature during use.
- The motor has been manufactured using patented coating technology to extend its life.
- Ergonomically designed, making the KD71 easy to grip and comfortable to use.
- Uses high quality carbon brushes, for an increased lifespan.
- Designed for heavy duty work with a long life span.
- Double insulated.
- Vibration control.

## KD71

230mm ANGLE GRINDER

2600W \ 6600RPM  
CODE: POG230K001

- 360 degree cooling system; effectively controls the grinder's temperature during use.
- The motor has been manufactured using patented coating technology to extend its life.
- Ergonomically designed, making the KD71 easy to grip and comfortable to use.
- Uses high quality carbon brushes, for an increased lifespan.
- Designed for heavy duty work with a long life span.
- Double insulated.
- Vibration control.

## KD09

13mm IMPACT DRILL

850W \ 0-4800BPM \ 0-3000RPM  
CODE: POD013K001

- Switch with electronic speed control and reverse function.
- Needle bearing design on the drill shaft to ensure high accuracy when drilling.
- Expertly designed with durable materials and a metal gearbox for a long life span.
- A slim and compact body with an ergonomic design for comfortable and easy use.

## KD28

26mm SDS+ ROTARY HAMMER

850W \ 0-4500BPM \ 3.3J \ 0-1300RPM  
CODE: PODSDS026K002

- The rotary hammer's components are made of a special steel, enabling a long life span.
- Optimised design of components maximises the drill's efficiency.
- 3.3J Impact power, competitive with leading brands.
- Soft start switch.
- Vibration control.
